The Physics 10293 (Archaeoastronomy) Home Page
Although Stanford University does not have a degree program in astronomy or astrophysics, teaching and research in various branches of these disciplines are ongoing activities in the departments of Applied Physics, Physics, SLAC National Accelerator Laboratory, and Hansen Experimental Physics Laboratory (HEPL).

Astronomy Laboratory Exercises
It is the only workbook on observational astronomy worth buying. That said, I do not use it as a lab manual for my introductory college-level class, but rather for my 200-level observational astronomy class. As it is self contained, and includes many historically important exercises, it is the perfect workbook for a process based class.

Astronomy A Process Approach Lab
Astronomy Labs: A Concept Oriented Approach is a modular collection of 40 conceptually oriented introductory astronomy labs housed in the Pearson Custom Library, allowing for easy creation of a customized lab manual. The labs focus on the mid to higher levels of Blooms taxonomy: application, synthesis, and analysis.

Contemporary Activities in Astronomy: A Process Approach ...
Astronomy is science that will challenge your imagination. How many stars in a galaxy? How many galaxies in the known universe? How many strange worlds are out there on other planets, orbiting other stars, and what are they like? Is there life on planets besides Earth? The distances are mind-boggling; the numbers are immense.

ASTRONOMY LABS: A Concept Oriented Approach by Nate McCrady & Emily Rice Available now via Pearson Collections. Instructors can select from 40 labs (at a cost of $2.50 per lab to the bookstore, for a typical cost of $25 per semester) covering topics from quantitative reasoning, Earth's perspective, tools for astronomical observations, Solar System & exoplanets, stars, galaxies, and cosmology.

Astronomy Science Projects
They had used them to find the way back home. The changing faces of moon, the holy occurrences of the eclipses and the day-night pattern had made them wonder and think about the reason behind these. And this wonder and amazement along with the human spirit of understanding and using the acquired knowledge gave birth to the Astronomy.

ASTRONOMY LABS by McCrady & Rice
Contemporary Activities in Astronomy emphasizes the process of science rather than the product. As practiced by most scientists, it is a process-a vital, ongoing enterprise-that is constantly changing and emerging with new information. This text will help you teach your students to learn.
