CiteScore: 2.34 | CiteScore: 2019: 2.340 CiteScore measures the average citations received per document published in this title. CiteScore values are based on citation counts in a given year (e.g. 2015) to documents published in three previous calendar years (e.g. 2012 - 14), divided by the number of documents in these three previous years (e.g. 2012 - 14).

Biochemistry And Analytical Biochemistry

Biochemistry and Analytical Biochemistry journal publishes the broad scope research and methods for the basic biological sciences that include biochemistry, molecular genetics, cell biology, proteomics, immunology, bioinformatics etc.

Analytical Biochemistry | GRIP | Rijksuniversiteit Groningen

Physical Biochemistry deals with the structure of biological macromolecules at various levels and how their chemical structure impacts physical properties of a substance and the biological process. Physical biochemistry uses different techniques to analyse the rate of a biochemical reaction, molecules interaction, calculation of structures and functional properties of the biological system.

Analytical Biochemistry | Journal | ScienceDirect.com

Analytical biochemistry is the identification and qualitative and quantitative analysis of different molecules taking place in a biochemical reaction. It includes the development of different tools and methods for identification, analysis and examination of physical properties of different biochemical compositions to provide better chemical information.
