BMW N20 Common Problems & Reliability Issues - BMW Tuning

This 2.2-litre Z4 has BMW's M54 straight-six engine, superseded by the N52 at facelift time in '06. A misfiring M54 probably just needs a DISA valve. The N52 has hydraulic cam lifters that can suffer from losing oil, leading to a tractor-like noise when starting from cold. Check the coolant expansion tank for leaks.
