Ch 13 Cardiovascular System Packet

Persons with higher-than-normal homocysteine blood levels are at higher-than-normal risk of cardiovascular disease. Deficiency of vitamin B6, B12, or folic acid can raise homocysteine blood concentration, which can be corrected by vitamin supplements, but treatment is harmful to coronary heart disease patients by promoting cell proliferation in coronary artery plaques.

Anatomy & Physiology: Chapter 13 - Cardiovascular System ...

A. The cardiovascular system consists of 1. Heart 2. Blood

Read Free Ch 13 Cardiovascular System Packet Answer Key

vessels a) Arteries b) capillaries c) veins B. Supplies oxygen and nutrients to tissues C. Removes wastes from tissues D. The pulmonary circuit carries deoxygenated blood to the lungs E. The systemic circuit sends oxygenated blood to all body cells

infarction 8. blood pressure 9. dyspnea on exertion 10.

Chapter 13 - The Respiratory System

The cardiovascular system is sometimes called, simply, the circulatory system. It consists of the heart, which is a muscular pumping device, and a closed system of vessels called arteries, veins, and capillaries. As the name implies, blood contained in the circulatory system is pumped by the heart around a closed circle or circuit of vessels as it
