Chapter 10: The mention of a tornado conjures up images of raw destructive power. Tornadoes blow houses away as if they were made of paper and have been known to pierce tree trunks with pieces of straw. They descend from clouds in funnel-like shapes that spin violently, particularly at the bottom where they are most narrow, producing winds as high as 500 km/h.

Student Workbook for College Physics: A Strategic Approach ...

I took "physics for scientist and engineers". Which is also called University Physics. College physics is physics without the calculus notation. I went to school in the 80's and took applied physics which is the same as college physics. If you not up on physics I would take calculus 1 and 2. Then take university physics which has calculus.
