Following questions have been asked in GATE CS 2012 exam. In class C, 8 bits are reserved for Host Id and 24 bits are reserved for Network Id. Out of these 24 Network Id bits, the leading 3 bits are fixed as 110. So remaining 21 bits can be used for different networks. See this for more details. 4 ...

The Most Common Computer Network Problems and Their Solutions. Common computer networking issues cause problems in an office as well as home setups. Common as these issues are, they can be solved by just paying a little attention to details. Here's some more on addressing common networking problems.

There are far too many potential problems to cover in one online post in detail. So, this article will cover a few of the most common network security problems and their solutions to help you cover your bases. Problem #1: Unknown Assets on the Network

## ~~Topic wise multiple choice questions in computer science~~

Graduate students, researchers, and practitioners in the field of computer networking often require a firm conceptual understanding of one or more of its theoretical foundations. Knowledge of optimization, information theory, game theory, control theory, and queueing theory is assumed by research papers in the field.

## ~~Computer Networking Problems and Solutions [Book]~~

Computer Networking Problems and Solutions offers a new approach to understanding networking that not only illuminates current systems but prepares readers for whatever comes next. Its problem-solving approach reveals why modern computer networks and protocols are designed as they are, by explaining the problems any protocol or system must overcome, considering common solutions, and showing how those solutions have been implemented in new and mature protocols.

PROBLEM SOLUTIONS 1 SOLUTIONS TO CHAPTER 1 PROBLEMS 1. The dog can carry 21 gigabytes, or 168 gigabits. A speed of 18 km/hour equals 0.005 km/sec. The time to travel distance  $x$  km is  $x/0.005 = 200x$  sec, yielding a data rate of  $168/200x$  Gbps or  $840/x$  Mbps. For  $x < 5.6$  km, the dog has a higher rate than the communication line.
