~~23.1 Overview of the Digestive System — Anatomy and Physiology~~

While the endocrine system is concerned with the production of hormones, the digestive system is involved with processing food. Although the two systems seem quite different, the gut is actually the largest of the body's endocrine organs, making the endocrine system and digestive system closely linked.

~~Endocrine System Worksheet Name — Amazon S3~~

endocrine system. Endocrine Glands are those glands which have no duct and release their secretions directly into the intercellular fluid or into the blood. The collection of endocrine glands makes up the endocrine system. The main endocrine glands are the pituitary (anterior and posterior lobes), thyroid, parathyroid, adrenal
