Solar panel kits can be used for a number of applications and are becoming more popular as the cost of solar panels has declined by more than 70% in the last decade. The most common use for solar kits are RV travelling, camping, boating and small off-grid cabins, as solar is a more attractive alternative to loud and smelly diesel generators or additional batteries.

While the panels do in fact still provide power on a cloudy day, they will not be quite as efficient as full sunlight. The solar panels I used are found on Amazon for about \$114.00 each seen above. I have been impressed with them but keep in mind the technology improves almost daily so do your research and read reviews.

“Solar shingles is the way the industry is moving. It makes perfect sense.”  
Currently, aside from new construction, solar shingles make the most sense if your roof is old and needs to be replaced prior to installing solar. “Someone who

just installed a new roof in the past five years probably would not opt for solar shingles," he says.

## *Do-it-Yourself Solar and Wind Energy System: DIY Off-grid ...*

Do it yourself solar for \$4,000 is a slamdunk in my book. Especially in states like Florida, Arizona, California, Utah, Texas and Oklahoma, to name a few. And solar boosts the value of your home at resale by a huge amount, so it makes sense even if you don't stay in your home.

## *Do It Yourself Solar Installation*

The 5 step process to DIY solar panels  
Design and size your system based on energy needs. Purchase your solar equipment (solar panels, inverters, racking). Install the racking or mounts for the panels. Connect the solar panels to your racking equipment. Install a solar inverter.
