SharePoint Document IDs. The SharePoint Document ID Service is a new feature of SharePoint 2010 that offers a number of useful capabilities, but carries some limitations. Let's dig a bit deeper and see what it does and how it works. One challenge for SharePoint users is that links tend to easily break.

SharePoint 2010

The default behavior for assigning document IDs assumes that if an item exists and already has an ID, SharePoint Server 2010 should overwrite that ID with a document ID. This happens when an existing item in SharePoint Foundation 2010 is copied: The copy keeps the same metadata as the original, including the document ID, but it still throws the ItemAdding(
