I just bought a 2003 Mack CX 613 with a 427 horse E7 with 507k miles. Is there any way to read fault codes without the scanner? I ask this because someone told me you can manipulate certain speed and other settings in the computer by pressing a certain combination of buttons on the dash and somehow entering the last so many numbers of the VIN.

Yeah the ole E9 V8 and the mechanical E7 powered Mack's were their best engines ever. When they went to the electronics they have had problems. I hear their new MP engines are great and have far less problems.
