Money Word Problems

There are Always Five Variables. Every time value of money problem has five variables: Present value (PV), future value (FV), number of periods (N), interest rate (i), and a payment amount (PMT). In many cases, one of these variables will be equal to zero, so the problem will effectively have only four variables.

Time Value of Money - Example Problems

Top 5 money problems Americans face. This statistic is shocking to most people who hear it as we often think only the lower earners (the lower and lower-middle class) deal with serious money problems. To find out the vast majority of Americans have been in this same boat is not only surprising, it's a bit disconcerting.

Apple's Money Problem (& Why It Won't Buy Netflix)

Money now is more valuable than money later on. Why? Because you can use money to make more money! You could run a business, or buy something now and sell it later for more, or simply put the money in the bank to earn interest. Example: You can get 10% interest on your money. So \$1,000 now can earn ...
