FLUID MECHANICS

Students Debut One of the World's Most Sophisticated Autonomous Boats for its Size. Engineering students from the Robotics Association at Embry-Riddle built Minion, a pilotless 16 ft.-long boat, which is possibly one of the most sophisticated self-driving boats in the world for its size.

Skoltech - Sonis SIS : Programs

Various definitions of transmissivity as it stands in the groundwater hydraulics literature fall into one of the following categories: 1. The rate of flow under unit hydraulic gradient through a cross-section of unit width over the whole saturated thickness of the aquifer (Bear, 1979; Kruseman and de Ridder, 1990), 2.

Nuclear Engineering Schools and Degrees ...

Sequence of Study: Courses taken in the Freshman and Sophomore years, either at Sacramento State, or at a Community College or transfer college, directly contribute to the upper division (Junior-Senior) program. For example, upper division work in Computer-Aided Design (CAD) develops skills introduced in freshman graphics and CAD courses; upper division analytical courses depend on the ...

What is the Main Focus of a Nuclear Engineering Degree? Nuclear engineering is the most integrated of the engineering disciplines. The many components of nuclear systems (medical imaging, nuclear fission reactors, ultrasensitive contraband detectors, and fusion reactors) must all be understood as well as how they relate to one another.
