Programming a Thermostat
thermostat) by connecting it to the equipment terminals (not at the thermostat!) between W and C if the unit goes blank during a call for cooling and Y and C if the thermostat goes blank during a call for heating. 3) Display goes blank during heating - The most likely cause is a furnace that is tripping on high limit or some other safety limit.

Troubleshooting Common Thermostat Problems
GLOSSARY OF TERMS 6 LUXPRO® PSPU721T CYCLE RATE - Cycle rate is the frequency that heating or cooling equipment is turned on during a certain period of time. Cycle rate is often given in units of cycles per hour (CPH). DIFFERENTIAL - Differential is defined as the difference between the cut-in and cut-out points as measured at the thermostat under specified operating conditions.

102-0471 AA8353 Manual - Aprilaire

Jameson thermostat manual - SlideShare
1. Mount the thermostat on an inside wall, about 5 ft. (1.5m) above the floor. 2. Do not locate the thermostat where air circulation is poor such as in a corner, alcove, or behind a door that is normally left open. 3. Do not locate the thermostat where unusual heating or cooling conditions may

Emerson Thermostat User Manuals Download - ManualsLib
A little irritated that there's no available info on this stupid thermostat. We have exactly the same problem as the previous question that got no answer, only an irritating reply asking even more questions. Fan does not come on. Thermostat says it's about 88 F in the house. We have it set to 74, now down to 72, because we're roasting. It's over 90 outside. No fan. No AC turning on. It's been ...
