~~preliminary or qualifying examination in real analysis. The purpose of this book is to teach the material necessary to pass such an examination. I had three main goals in writing this text: (1) present a very clear exposition; (2) provide a large collection of useful exercises; (3) make the text affordable. Let me discuss each of these in more detail.~~

Mathematical analysis is the branch of mathematics dealing with limits and related theories, such as differentiation, integration, measure, infinite series, and analytic functions.. These theories are usually studied in the context of real and complex numbers and functions. Analysis evolved from calculus, which involves the elementary concepts and techniques of analysis.
