Principle #5 - Context. A useful distinction is made in the framework between internal context and external context. Internal context is defined by one's state of thought, emotion, and belief. External context is defined by the presence of other people, the physical setting, and any tools or objects present.

Context | Principles of Learning

key principles and concepts of quality are identified, understood, and used. The most durable and widely cited definition of healthcare quality was formu-lated by the Institute of Medicine (IOM) in 1990. According to the IOM, quality consists of the "degree to which health services for individuals and populations

Principle #5 - Context | Principles of Learning

Aristotle's famous law of contiguity (Ross & Aristotle, 1906, p. 111) has held up for literally hundreds of years in the study of human learning and underlies the principle of association behind both behavioral and cognitive learning theory. Application of this law toward the understanding of the role of context suggests that all elements apprehended...

Theories Chapter 1 | Social Science Flashcards | Quizlet

Law enforcement practices constitute the second major focus of Principles of Good Policing, taking into account major areas of police responsibility that can produce incidents that escalate into violence. In isolating these situations, the publication suggests how procedures, tactics, and techniques might be modified—or new approaches
