(e.g., Swallow, Molinari, Bruce, Brown, & Evans, 1983).

~~The Monsoon Trade System: An Indian Ocean Network ...~~

Long before Europeans "discovered" the Indian Ocean, traders from Arabia, Gujarat, and other coastal areas used triangle-sailed dhows to harness the seasonal monsoon winds. Domestication of the camel helped bring coastal trade goods such as silk, porcelain, spices, slaves, incense, and ivory to inland empires, as well.

~~Indian Ocean Currents | Effect of Monsoons on North Indian ...~~

The theme of "Monsoon" is that the Indian Ocean will become the next major commercial waterway for the world (hence the title), because it is the connector of an emerging Africa and a burgeoning economic power in South Asia. He then proceeds to define the role of each of the territories bordering the Indian Ocean in this new order.

Highway Across the Ocean. The monsoon is a seasonal wind that reverses direction twice a year. Starting in June, the Indian subcontinent heats up, creating a low-pressure system that draws cool, moist air from the southwest. This produces a wind that blows steadily through the summer months and brings the rains that sustain India's agriculture.

~~Monsoon: The Indian Ocean and the
Future of American Power ...~~

The Indian monsoon rainfall is influenced by a system of oscillating sea surface temperatures known as the Indian Ocean Dipole (IOD) in which the western Indian Ocean becomes alternately warmer and then colder than the eastern part of the ocean.

~~Monsoon Current | ocean current |
Britannica~~

The Indian Monsoon Current alters the current of ocean waters in the tropical northern region of Indian Ocean. During winter, currents are blown towards the westward near the Indonesian Archipelago to the Arabian Sea. However, during the summer, the direction of the currents reverses, going toward the Bay of Bengal.

~~Indian Monsoon Current — Wikipedia~~
Monsoon is a book about the geography and geopolitics of the Indian Ocean region. It could be described as a travelogue, but Kaplan is deeply interested in the politics of South Asia as well. He travels from west to east, from Yemen to Indonesia, describing the histories, current political climates, and ambitions of the countries ringing this huge region.

Monsoon - Wikipedia

Indian monsoon, the most prominent of the world's monsoon systems, which primarily affects India and its surrounding water bodies. It blows from the northeast during cooler months and reverses direction to blow from the southwest during the warmest months of the year. This process brings large amounts of rainfall to the region during June and July.

Asia.

Indian Ocean Trade Routes: Asian History

With this air pressure begins to build over northern India, the Indian Ocean and its surrounding atmosphere still holds its heat. This causes cold wind to sweep down from the Himalayas and Indo-Gangetic Plain towards the vast spans of the Indian Ocean south of the Deccan peninsula. This is known as the Northeast Monsoon or Retreating Monsoon.
