Cartesian equations are equations involving the standard calculus variables x and y , as well as constants. We can rewrite $y(t)$ in the general solution as $y(t) = C_2(e^{3t})^{-1} = C_2 x(t) C_1^{-1}$ so that the Cartesian equation describing the curve is $y = C_2 C_1^{-1} x$ or combining the two constants into a single constant C , $xy = C$. 4
