Peugeot 406: *Common Problems and Solutions* | BreakerYard.com

The Peugeot 406 was first produced by the French manufacturer in 1995 and remained part of their European range until 2005. It was available in a number of styles and engines including economical 1.6L petrol and more powerful 2.9L V6 petrol models. With saloons, estates and coupe variants, there was something for everyone in this [...]

How to prevent common turbo failures with the Peugeot ...

Hi I have a 2001 HDi 110 Peugeot 406. Not had any problems at all in the past 6 months. Yesterday while working on another of my cars I left the radio on in my Peugeot which required me leaving the complete ignition on. A few hours later I went to start the car only for the battery to struggle to turn the engine over, my fault.

Peugeot 406 Engine: *problems and issues - StartMyCar*

Problem: On the HDi version of the Peugeot 406, it is common for the diesel pump to fail. If this is the case, you will have problems with starting the car, whether it is cold or warm.

Peugeot 406 Engine Problems

Peugeot 406 2001 222000 miles My vehicle trembles considerably, is powerless and the engine makes a strange noise. Injectors and wires have been changed but the problem was not solved. The mechanic is now telling me that it is a cylinder that is failing, but it also seems to be an electronic problem.

Peugeot 406 (2002 - 2004) - fuse box diagram - Auto Genius

My car is a T reg 406 HDi with 70K. I have an infrequent but dangerous problem. When acceleratating - but not severely - I get a slight judder from the engine like a slight misfire whereby the engine shuts down completely. Dashboard lights remain on. The car can be restarted but the engine is highly likely to shut down again. Anyone have similar problems and answers?

Recalls and faults: Peugeot 406 (1996-04)

What's that sound, where it comes from?

SOLVED: 1996 406 engine fuel problem - Fixya

The engine had a distinctive design; the gearbox and differential were located directly below the engine block. This design helped Peugeot produce its first front-wheel-drive car. The original XX had an 1.130 cc displacement; later the 1.3 liter XL engine appeared and then the 1.5 liter XR series which was developed specifically for the 305.

Peugeot problems, faults and solutions | BBA reman

Having said that the Peugeot 406 2004 is made with an excellent level of build quality, problems with the four-cylinder petrol engines have been reported. Quite a lot of users have experienced engine stalling, especially with the 2.0-liter versions, so make a point of starting the engine from the cold when doing the test drive.
