The University of Pennsylvania Smell Identification Test (UPSIT) is a test that is commercially available for smell identification to test the function of an individual's olfactory system. It has been administered to about 500,000 patients to this date. It is the gold standard of smell identification tests for its reliability ($r=.94$) and practicality.

Their smell preference are vastly different than that of humans in many respects. So you can't just guess what mice will hate to smell: you have to learn it. But before we get into the specific smells that deter mice, here are five general principles to keep in mind about how to choose and use these anti-rodent scents:
