Quiz: Can You Ace The Ultimate "Sound of Music" Quiz ...

makes music or to understand the rationale for the development of the musical scales one needs a broad foundation in most elements of wave and sound theory. With that said, the approach here will be to understand music and musical instruments first, and to study the physics of waves and sound as needed to push the understanding

Sound of Music Quiz! - gotoquiz.com

Answers: See below. The equation which relates the intensity of a sound wave to its decibel level is: $\text{dB} = 10 * \log(I / 1.0 \times 10^{-12} \text{ W/m}^2)$. where I = intensity of the sound in units of W/m^2 . Using this equation, parts a - d can be computed in straightforward fashion.

Sound Waves and Music Review - Answers #3

Answer: B. The wavelength of a wave is measured as the distance between any two corresponding points on adjacent wave. For a sound wave, that would be from compression to the next adjacent compression. If that distance is 3.0 meters, then the distance from compression to the next adjacent rarefaction is 1.5 m.
