Philo of Byzantium provides probably the most detailed account on the establishment of a theory of belopoietics (belos = "projectile"; poietike = "(art) of making") circa 200 BC. The central principle to this theory was that "all parts of a catapult, including the weight or length of the projectile, were proportional to the size of the torsion springs".

Additional projects include learning how to lash and make rope and how to construct and use a hand sling and a staff sling. The colorful history of siege warfare is explored through the stories of Alexander the Great and his battle of Tyre;

~~The Art of the Catapult: Build Greek Ballistae, Roman ...~~

The Art of the Catapult followed - Tom was definitely in school today; he took the dog-eared, also creepily stained how-to project book with him everywhere he went, like some stupid security blanket - and finally spotted what she was looking for. Johanna carefully extricated her English textbook, swooped up in one fluid move, and ran into ...
