Anaximander. Anaximander, (born 610 bce, Miletus [now in Turkey]—died 546 bce), Greek philosopher who was the first to develop a cosmology, or systematic philosophical view of the world. Only a short fragment of Anaximander's work survives, so reconstructions of his philosophy and astronomy must be based on summaries by later Greek...

Anaximander is known as the author of first Greek “treatise in prose” and is claimed to be the first to propose notions like: “The earth floats in space; that all living creatures have descended from a common ancestor or meteorological events were not caused by gods”. The evidence of most of his work though, is second hand.

~~Anaximander > By Individual Philosopher > Philosophy~~

Anaximenes of Miletus was an Ancient Greek Pre-Socratic philosopher active in the latter half of the 6th century BC. The details of his life are obscure because none of his work has been preserved. Anaximenes' ideas and philosophies are only known today because of comments made by Aristotle and other writers on the history of Greek philosophy. As one of the three philosophers of the Milesian School, considered the first revolutionary thinkers of the Western world, Anaximenes is best known and id
