The first thing after installing Kali Linux is to update it. To do that, we first have to update the repository and then we have to upgrade the system. Follow my Instagram Account to learn all the Linux Basics you'll ever need. Updating and Upgrading is a crucial first step in my workflow.

First step with Linux and Mageia - Mageia wiki

STEP 4 - Enable your firewall Most Linux distributions come with iptables by default. Iptables is a very powerful firewall but has quite a steep learning curve for those of us coming from a Windows Server background (don't hate!). While I plan on creating an iptables tutorial in the future, a much easier frontend for iptables is UFW.
