Plant-Based Meat: The Future of Food? Meat made without animals is having a moment. What happens next will decide just how big it gets-and if it will help save the planet in a major way. Published On August 8, 2020 Written By Hannah Sentenac

Impossible Foods, Beyond Meat See a Future Without Meat

The question remains whether we would have enough food for 9 billion people without animal meat being a rich nutrient source. Nature Disrupting the rain forests becomes unnecessary because the amount of soy and other plant-based protein sources that has to be cultivated has decreased tremendously (right now about 95% of the cultivated soy is fed to cattle).
