Benefits of programming in Java. Though no longer the only officially supported language for Android development and, of course, far from the only choice for web programming, Java keeps pace with the alternatives. And since that's not only thanks to its respectable age, let's explore what advantages Java has to offer.

5. Swift. One of the applications of Java programming language is to build applications that will run on iOS and Mac-OS. The good news is there are other alternative programming languages that can do the job perfectly. One of them is Swift. One important characteristic of Swift is speed. The language is relatively faster than Java.
