Muscular System (Quick Study Academic): Inc. BarCharts ...

The muscular system is responsible for the movement of the human body. Attached to the bones of the skeletal system are about 700 named muscles that make up roughly half of a person's body weight. Each of these muscles is a discrete organ constructed of skeletal muscle tissue, blood vessels, tendons, and nerves.

Muscular System Anatomy and Physiology - Nurseslabs

Muscular system is composed of special tissue called muscular tissue. Muscles have the ability to contract actively to provide the force for movements of body parts. Muscular system is an important system of human body because without it, life will completely stop.
