I need to find out how to get inside my mid-80's Yamaha Pf-15. I think I was trying to figure out how to open it up a few years ago, and I started unscrewing things on the back. . . all that did was unfasten a metal nut that's now rattling inside, making me cringe whenever I turn the thing on, for fear that the metal part could be about to short a circuit.

You can transpose though I can't remember exactly how that worked...it was in the manual which I found online somewhere but I never do it...but it is possible. Now I know a lot of people would probably say that for \$500 it's a steal...which it probably is, but how are the speakers? They don't hold up so well. Not 20 years later.
